

KERRY'S Sprinkler systems

706 West 13th Street • Brookings, SD 57006
692-1605

As soon as the sod is down you need to stop down at the Brookings Utilities & get a water permit as you will be watering more than 4 times per week. The address is 525 Western Ave & the phone # is 692-6325.

Sprinkler System

1st week 3 times a day (we want to keep the sod very wet)

2nd week 2 times a day 3am & 2pm

3rd week 4 times a week per city schedule

3rd week spray heads 10-15 minutes, rotors 20-30 minutes depending on temps.

If it rains turn the system off until the ground firms up then turn the system back on.

You can add rain sensors for \$125.00 that automatically shut the system off.

Sod

Fertilize every 4-6 weeks.

After 10 days shut the water off, let the ground firm up & mow has high has the mower will go. (don't scalp the sod)

Spray for weeds in the fall.

Plants

Some plants are getting water with the sprinkler system, make sure they don't get too much water, if they are turn down the time on the sprinkler. You can tell by checking around the plants & making sure that there's not mud around them, the dirt should be moist.

The plants that don't get hit by the sprinklers need to be checked. Feel around the plant & make sure the dirt is moist.

If you take good care of the plants the first month they should be fine the rest of the year.

Thank you. We hope you are enjoying your beautiful Valley View home. If you have any questions please call me at 692-1605.
